THIRANEX VIRTUAL INTERNSHIP

C++ PROGRAMMING

AN 4 WEEK PROFESSIONAL
INTERNSHIP PRESENTATION REPORT

INTERNSHIP DURATION

**JULY-AUGUST 2026(4
WEEK)**

STUDENT CREDENTIALS

ALOK MISHRA

Enrollment / Roll No

25scs1003002280

Program & Semester

B.Tech (CSE)

THIRANEX

THIRANEX

Candidate & Program Overview

Candidate Details

Student Name: Alok Mishra

Roll Number: 25SCS1003002280

Degree: B.Tech (Computer Science & Engineering)

Academic Batch: 2025-2029

University: IILM University, Greater Noida, U.P.

Internship Profile

Program Name: Thiranex Internship

Internship Domain: C++ Programming

Duration: 4.WEEKS (01th AUG 2026 – 02th SEP 2026)

STUDENT ID: THX-AUG0326-449

Issue Date: 01th August

Organization Profile: CodeAlpha

THIRANEX is a technology and software development organization committed to empowering students and aspiring professionals by providing practical learning experiences through internships and real-world project

Industry-Oriented Internship Programs

Offers internships in domains such as Web Development, App Development, Python, Data Science, Machine Learning, Java, and more.

Practical Learning & Projects

Focuses on hands-on training, real-time projects, and problem-solving to enhance technical skills and industry readiness.

Mission

To bridge the gap between academic knowledge and industry requirements by providing quality learning, mentorship, and exposure to modern technologies.

Problem Statement & Industry Context

The Industry Challenge

While academic curriculum extensively covers building Machine Learning and Deep Learning models, students often lack hands-on exposure to deploying models into real-world production systems.

A high-performing ML model in a Jupyter Notebook provides zero business value until it is exposed as a reliable, scalable, and secure API service.

The Solution Scope

This internship addresses the complete end-to-end lifecycle of production AI: model serving, container packaging, cloud hosting, automated scaling, observability, and retraining triggers.

Mastering industry-grade tools (FastAPI, Docker, Kubernetes, LangChain, SageMaker) to transform research prototypes into enterprise AI solutions.

Curriculum Timeline (Weeks 1 to 4)

1. Student Management System

To develop a console-based Student Management System in C++ that efficiently manages student records using file handling and menu-driven operations.

A functional application that allows users to add, update, delete, and display student information with persistent data storage for reliable record management.

2. Bank Management Application

To design and implement a C++ based Bank Management Application that simulates core banking operations using object-oriented programming and file handling.

A secure and functional banking system capable of performing deposits, withdrawals, and balance inquiries while maintaining persistent customer records.

3. Library Management System

To develop a Library Management System that efficiently manages books, members, and borrowing records using structured or object-oriented programming.

A functional application that enables book addition, issue and return processing, and search by title or author for streamlined library operations.

4. Mini Game Project (Tic Tac Toe / Snake Game)

To create a console-based mini game in C++ that demonstrates core programming concepts such as loops, arrays, and conditional logic.

Certification & Official Verification

Verification Metric	Official Record / Credential Details
Internship Title	C++ Programming Virtual Internship
Issuing Organization	THIRANEX
Academic Patronage	Thiranex Virtual Internship Program
Certificate ID	THX-AUG0326-449

Certification & Official Verification

Thank You!

Alok Mishra

Roll No: 25SCS1003002280
